LS **One** | Hospitality

One software solution to succeed in the hospitality business

LS One Hospitality

The complete POS system that brings rapid benefits to both large and small restaurants and food service businesses.

Fast to implement and easy to learn, LS One Hospitality includes a complete POS and back office software that will enhance your customer service while giving you core administrative functionalities. Use LS One Hospitality to manage your inventory, keep track of your customers, speed up your service and understand your restaurant's sales results.

Increase your efficiency with

Simple transfer of orders between tables

Easy-to-use Point of Sale

Multiple tender payments, split and partial bills
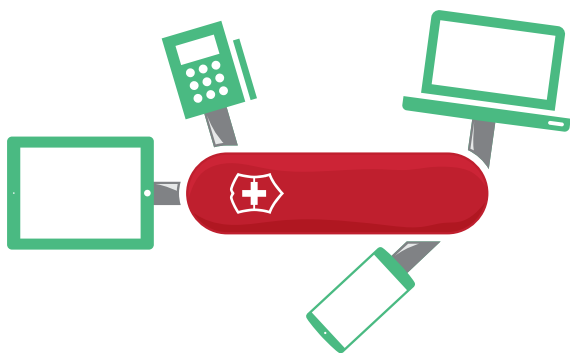

Kitchen monitors & work station printing

Upselling and cross-selling tools at POS

LS One Hospitality will help you

- Serve customers timely as the POS sends orders straight to the kitchen

- Configure offers, promotions and discounts

- Be more resilient, as the POS can work offline if the network is down

- Keep your customers returning by offering a loyalty program

- Speed up your staff training

- Discover your strengths and weaknesses with a large number of reports

Versatile Point of Sale
Handle all POS operations

The LS One Hospitality POS is easy to use and feature-rich. Some of its benefits include:

- **Hospitality-specific tools, including management of split bills, transfer of orders between tables and special requests.**
- **Reduced training times thanks to the intuitive graphical user interface.**
- **The POS layout can be changed with the touch of a button. You can even select different POS looks and menus for your bar and restaurant.**

Tools for restaurant management
Have your restaurant under total control

Streamline your restaurant business and enhance your whole operation, from kitchen to POS to back office. LS One Hospitality will enable you to:

- **Monitor your whole operation from back office**
- **Speed up your ordering process**
- **Prevent loss by restricting access to specific POS operations**
- **Analyze your sales and perfect your business strategy**
- **Reduce capital binding in inventory**

Offers and promotions
Keep your customers coming back

Attract new and old customers with promotions and offers. With LS One Hospitality it is easy to set up and manage promotions based on various parameters, like time of day, item, item group and much more. Create weekend or happy hour offers, set up a coffee-and-cake discount, offer menus for a fixed price. Once the offers are set, the system makes sure that they are applied only when the orders qualify.

Powerful and versatile
Easily integrate with your ERP

Do you already have an ERP or back office system, and need a powerful, flexible and easily integrated POS solution? **Then LS One Hospitality is the right choice for you.**

Thanks to its intelligent integration architecture, LS One Hospitality can be connected to any ERP system. Data seamlessly flows from the ERP to the POS system and back, so you can rest assured that your key business data is always correct and up-to-date.

LS One Hospitality has been successfully integrated with ERP solutions such as SAP, Oracle and Microsoft Dynamics.
